DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Invention I, i.e. claims 17-19, in Paper No. 9 is acknowledged.

Also, applicant's election without traverse of Species IV, i.e. Figures 20 and 21, is acknowledged. It is noted that the election of Species IV was made in an phone interview on November 3, 2003 by Mr. James R. Shay. Also, applicant believes all claims 17-19 read on the elected Species. The examiner agrees with applicant. It is noted that no claim is generic as stated in the Restriction Requirement.

Claims 20-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Invention and/or Species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 9 and phone interview on November 3, 2003.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3732

Claim rejected under 35 U.S.C. 102(e) as being anticipated by Jobe (Reference US Patent 5,785,713 on PTO-1449).

Jobe discloses a compression staple or fixation apparatus of a resilient material and having a U-shaped configuration (see Figure 13). The staple or fixation apparatus comprises first and second spaced-apart longitudinally extending legs 72 with sharp free ends and proximal ends; a bridge portion 74 interconnecting the proximal ends of the legs 72 (see Figure 13). The legs 72 have a convergent orientation (see Figure 13) and they are capable of resiliently held in parallel orientation wherein the legs are urged toward their initial convergent orientation with a predetermined force (see Figures 14 and 15).

Allowable Subject Matter

Claims 18 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 for art cited of interest.
